

“

I am Frank Stephens, a Global Down Syndrome Foundation Research Advocate. Alzheimer's disease research is very personal to me. My mom has advanced Alzheimer's and it is breaking my heart to watch how it is affecting her. People like me with Down syndrome are at a very high risk for developing Alzheimer's as we get older. That is terrifying, but it means we are like a medical blueprint to researchers who are trying to find treatments for Alzheimer's. We could provide the key to getting rid of this disease forever. Researchers need our help. They need us to participate in their studies. I want you to follow me and JOIN the Trial-Ready Cohort-Down Syndrome.

”

I'M READY TO MAKE HISTORY!
HOW ABOUT YOU?

TRCDS
Trial-Ready Cohort-Down Syndrome

The Trial-Ready Cohort – Down Syndrome (TRC-DS) is a community of potential clinical trial participants who could help find a cure for Alzheimer’s disease. TRC-DS is funded by the National Institutes of Health’s INCLUDE Project, in collaboration with [ACTC-DS](#) and [ABC-DS](#).

If you are a healthy person, ages 25 – 55, with Down syndrome, learn how you can make a difference.

TRC-DS is recruiting participants at research centers across the United States and several countries in Europe.

Visit www.TRCDs.org to connect with a research center near you.
